Where the world of
cardiology comes together

Voting and Ask a Question – Technical Specifications

Speakers invited to present in Mobile App Interactive sessions are asked to include "Question Slides" in their presentation.

A demonstration video will be played at the start of the session to inform the audience on the functionality.

Chairpersons should at the start of the session invite the audience to participate in the votes.

Specific instructions for Speakers

The sessions must contain a high level of interactivity with the audience and the material must be suitable for educational purposes.

1 hour of rehearsal with speakers at the Speaker Service Centre

Use of the Speaker Service Centre is mandatory for all presentations

- Limit the number of questions, maximum 3 questions - Please keep in mind that it can take up to 3 minutes to "go through" a question
- In order to keep the voting process fast and simple, we recommend that you construct your voting questions according to the following principles:
    - Keep the questions short and clear
    - Provide no more than 5 possible answers
    - Give the possible answers a letter from A to E
    - For a "yes /no" question, use the format "A = yes, B= no"
- Prepare a slide with the question and multiple choice answers - this is the slide which must be shown at the speaker service centre - to be tagged with a "vote" button, which you will be asked to activate to launch the voting during the session.
- Before launching the voting, please give sufficient time to the audience to get their device out on the correct page - you should give them an indication "get ready to vote, open you Mobile App" and then show the question slide.
- To launch the voting, you need to click on the "vote" button which will be added to your slide by the technician - the audience then has 20 seconds to cast a vote.
- After the question is asked, results of the vote will be shown on the screen - this is generated automatically by the system.
- You can choose to have a slide showing the solution and explanation, to be displayed after the results are shown.

Deadline: 15 May 2018
