## RIGGING SERVICES

### Product

Anchoring points from the ceiling of the Hall to the elements you wish to suspend: structure, lighting, screens, signage, inflatables, etc.  
From a pivotal point with steel cable to points with either manual or electric motor for elevation.

### Benefits

The stand is visible from more areas of the venue.  
It optimizes the booth space and easy access for visitors, eliminating (ground support elements to the desired point.  
On site technical support.

### Guarantees and safety

The materials used comply with EU regulations.  
Installations are carried out in accordance with the safety coefficients of each hall.

### Basic conditions for suspended structures

All the materials to be used must be approved under EU Regulations.  
The number of anchoring points depends on the type of structure and the individual loadings of each hall.  
It is obligatory to use an additional security cable.  
The motor to the structure should always be vertical and must be used with slings that hug the structure and should be joined with a shackle joined to the motor.  
All suspended elements need to be approved by the management of each exhibition.

In some cases, the location of the stand can result in:

- Installation of an additional structures (also called pre-rigging), in order to make possible the installation of the hanging points, which will entail an extra charge.
- Technically it is not possible to install anchoring points.

The wooden elements that are to be hanged must be adequately fixed to an EU approved structure in order to ensure that the weight is adequately divided. The approved structure will be the one fixed onto the anchoring points or elevating system. Dependent on the type of structure and the weight capacities of each pavilion, the division of weights of the structure will be taken into account in order to determine the number and location of the anchoring points needed for suspension.  
We recommend the use of fireproof C1 cloth ceilings and 40%-60% vent meshing, in order to ensure the proper functioning of smoke and fire detector systems. Also, these ceilings must be fixed onto an EU approved structural frame.

For security reasons, exhibitors who require water or compressed air inside the halls must contract their installation through ServiFira.

**Under no circumstances may the exhibitor/decorator take it upon themselves to connect to Fira Barcelona's supply.**

Due to technical limitations, if you wish to use compressed air in Halls 3, 4, 5, 6 or 7 in Montjuïc venue, please check with ServiFira in advance on **(+34) 93 233 20 00**.

#### Note:

#### Rental of compressed air units

If you need a compressed air unit, contact ServiFira by calling **(+34) 93 233 20 00** and ask for a quote, giving the volume you need in litres per minute.

To ask for sink and special sink connexion installations during build up period, please go to the Customer Service HelpDesk.

#### Important note:

**Under no circumstances will the exhibitor's machinery be connected by our technicians. Likewise, water or compressed air connectors will not be provided for connection.**

**We recommend to request a platform when contracting any of these services.**

## FREQUENTLY ASKED QUESTIONS

### How do I know what kind of electrical panel I need?

You need to add up the total number of watts you need for your stand, including: lighting, machinery, computer equipment, audiovisual equipment, etc.

If you have contracted a stand through ServiFira, you do not need to add the power consumption from lighting as the stand includes the lighting panel.

If you will be exhibiting machinery, you need to consider whether it operates on a single-phase (230 V) or three-phase (400 V) system.

### What are the connection periods?

- **Daytime electrical panels:** These panels are connected each day 1/2 hour before the event opens and disconnected 1/2 hour after the closing time.

- **24-hour electrical panels:** These panels supply power throughout the whole event, 24 hours a day, and are recommended if you have fridges or machinery that needs to be permanently connected.

### If you contract a three-phase electrical panel with CBs, how many single-phase outlets will it have?

The number of CBs installed should always be in accordance with the following ratio:

Panel	Amps	Nº CB
8 kW	16 A	3
15 kW	32 A	6
20 kW	40 A	9
30 kW	63 A	12

- CB = Circuit Breaker
- 1 kW = 1,000 Watts

Remember that the socket cannot bear more electrical power than the power indicated in the CB.

### When is it necessary to provide an ELECTRICAL PLAN when contracting an electrical panel?

If the total kilowatts contracted through electrical panels is more than 50 kW, it is compulsory to submit an electrical plan in accordance with the regulations of the Department of Industry of the Generalitat of Catalunya.

### Electrical project is needed:

- For a switchboard superior to 50 kW
- For the sum of several switchboards (superior to 50 kW) in the same stand.

### When do I pay for my electricity charges?

Payments for electricity must be made before the assembly starts, and will be invoiced together with the electrical panel.

### VERY IMPORTANT INFORMATION

- The prices for renting electrical panels during the event include their official certification, but not consumption costs or the cost of the electrical plan if you are using more than 50 kW on your stand.
- Under no circumstances exhibitor's machinery will be connected by our technicians. Likewise, electrical connectors are not supplied (cables, extensions, adaptors, etc.).
- Payment of industry taxes is mandatory as from the second electrical panel, or from the first electrical panel for events held at Fira de Barcelona venues but not organised by Fira Barcelona.

If you hire an electrical switchboard there is no need to fill in form A as the electrical consumption will be automatically invoiced.

Order online visiting the Exhibition website or **[www.servifira.com](http://www.servifira.com)**

## FREQUENTLY ASKED QUESTIONS

### When are the electrical panels connected?

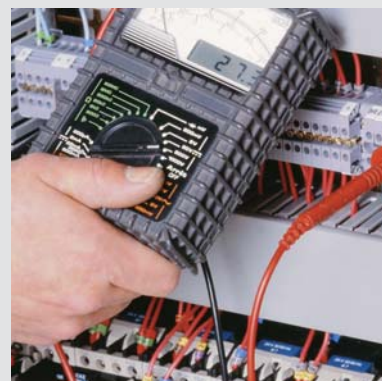

The electrical panels for the event will be connected on the final two days of the exhibition build-up date and when the electricians/installers submit the inspection reports or electrical plans to the official electrician of the Fira Barcelona responsible for Hall connections.

### What are the connection periods?

- **Daytime electrical panels:** these are connected each day 1/2 hour before the event opens and disconnected 1/2 hour after the closing time.
- **24-hour electrical panels:** these supply power throughout the whole event, 24 hours a day, and are recommended if you have fridges or machinery that needs to be permanently connected.

### What should I do if I do not have an authorised electrician/installer?

If you do not have an electrician/installer authorised by the Department of Industry of the Generalitat of Catalunya, we recommend that you order an electrical panel using form A and ServiFira will take care of everything for you.

### VERY IMPORTANT INFORMATION

- You do not have to fill in this information if you have ordered a switchboard through ServiFira.

### PROCEDURE FOR OFFICIAL CERTIFICATION OF ELECTRICAL PANEL

- 1 - You must go to the Customer Services Department to get the electrical power authorisation form (to submit this, all outstanding invoices must have been paid by the exhibitor and/or assembly company).
- 2 - Submit the following information to the Department of Industry (ICICT):
  - Inspection Report and official electrical certification from the Fira Barcelona.
  - Single-line diagram of the panels installed.
  - Electrical Power Authorisation Form.
- 3 - When the Inspection Report has been stamped and the installation is complete, hand in the green copy to the Hall Services Manager's office with the socket number to which the electrical panel has been connected.

## ELECTRICAL POWER

Cod. 512026 Daytime electrical power .....2.97 € / kW / Day

Cod. 512027 24 h. electrical power .....4.84 € / kW / Day

### INDUSTRY DEPARTMENT FEES (billed according to this table)

Electrical power	1st switchboard
Up to 50 kW	20.45 €
From 51 - 150 kW	319.31 €
From 151 - 300 kW	423.15 €

### Recommendation:

Get your electrician to order the electrical power you really need, given that the cost of electricity invoiced to you corresponds to the total kW accepted by your switchboard/s and not the kW per hour actually used.

### ELECTRICAL POWER

These are necessary for you to connect your electrical panel to the Fira's power supply.

Use the internet with a guaranteed flat rate connection directly to your stand, with no consumption charge thanks to Fira Barcelona's internet access lines.

### Technical specification

We deliver this service to only one location on your stand (it is mandatory that we receive a plan indicating the service location) including a category 5 cable with a RJ-45 connector. The computers/devices need to have a network card that supports 10/100 base T/TX Ethernet.

The addressing supplied is private (unless when ordering a public static IP) and is served using DHCP. The IP information/network mask and DNS service is automatically assigned.

It is possible to order public static IP's in order to have direct visibility from the Internet, in this case, the addressing will be given to the contact person and needs to be configured manually.

The connection does not have an Internet security filter, there is no access restriction. It is the exhibitor's responsibility to take necessary precautions with the configuration of his/her computer (antivirus,...) to ensure correct functioning.

Fira Barcelona reserves the right to disconnect from the network those equipment/devices belonging to exhibitors that due to configuration problems, viruses or any other cause that may compromise the network.

For further information regarding wired connection Internet please contact [internet@firabcn.es](mailto:internet@firabcn.es)

### Switch:

If you need to connect various PC's to the network line in the same stand you will need to hire (or bring your own) 1 switch/router and additional cable for each device that you require to connect to the network in addition to the network line itself.

In the case of hiring a switch, the exhibitor will have to take into account that a 220v socket is required for its functioning, a part from the sockets needed for each computer.

Please indicate with a "@" the location where you want the network cable to be placed on the technical plan.

Fira Barcelona has Wi-Fi cover for Internet access in all its exhibition premises.

The Wi-Fi service will allow you an easy connection to the Internet not only at your stand, but also anywhere without needing to install any software or cabling.

Given its performance and cost, this service is highly recommended for those exhibitors who wish to connect to the Internet on an occasional basis.

**However, keep in mind that Wi-Fi bandwidth is limited and we cannot therefore guarantee your connection speed.**

**Thus, we do not recommend this service for exhibitors who need a permanent connection and/or guaranteed bandwidth.**

If you wish, you can also contract a LAN service within your stand.

### Technical description

Wi-Fi Connection (802.11 b/g).

Broad band (internal network speed up to 54Mbps. Bandwidth cannot be guaranteed).

Speed of Internet access not guaranteed.

LAN functionalities eliminated (no visibility of other equipment in the network, impossible to share resources, etc.).

Private IP address (not addressable externally).

Provision of the service by TCP/IP.

Security: the Wi-Fi service has advanced security systems (firewall, control of users, etc.) Exhibitors are responsible for incorporating appropriate protection systems in their equipment (antivirus, no sharing of folders and files, etc.).

### Requirements

The exhibitor must take responsibility for providing the equipment (PC, laptop, PDA or mobile telephone) with 802.11b/g wi-fi technology.

The device must be set up with DHCP and without proxy.

The device must have an Internet browser installed, as well as the other applications to be used.

### Operation

In the exhibition premises, turn on the equipment and tune into the "firabarcelona" network.

The service is provided by means of access codes (user and password) for authentication by the system.

Run the Internet browser and enter any web page.

The default setting is the welcome page of the service in which authentication is required with the access codes.

## **ASSEMBLY SERVICES**

---

The company responsible for stand assembly must pay Fira Barcelona for the services detailed below before assembly commences:

- Cost of Fira Barcelona personnel necessary for the use of facilities (opening halls, manning technical services, operational organisation, office staff, etc...).
- Maintenance of halls for third-party use.
- Personnel needed for vehicle and pedestrian access to the venues.
- Hall layout for set-up of stands.
- Storage of stand material in common areas (aisles, outdoor avenues, etc.)
- Administration, verification and issue of working passes in line with Social Security regulations.
- Hall lighting during the assembly period.
- Use and maintenance of bathrooms by assembly staff.
- Preventative venue surveillance (control room, fire-fighting service).
- Manning of on-site medical facility.

These services will be invoiced in accordance with the rates shown below:

- Carpeting and/or platform: .....1.90 € m<sup>2</sup>
- Modular stand: .....4.40 € m<sup>2</sup>
- Design stand: .....6.85 € m<sup>2</sup>

**Remember that stands contracted through ServiFira include the above rates in their prices.**

## **WASTE REMOVAL**

---

Fira Barcelona informs you that all the stand builder's or Exhibitor's who build their own stands have to take care of the waste materials of their stands during the build-up period and make sure that the space assigned is left clean and empty at the end of the dismantling period.

If needed, the waste disposal can be ordered through the official cleaning supplier.

If any waste is left in your stand area after the dismantling period has finished, the building company or the Exhibitor company must pay for the waste disposal cost according with the official fees.

# CALCULATION AND OFFSET OF CO<sub>2</sub> EMISSIONS

A PLEDGE AND AN ADDED VALUE FOR YOUR CORPORATE STAND

## Description

### What is offset?

It's a mechanism arising from the Kyoto protocol which allows total or partial offset of any activity's CO<sub>2</sub> emissions through projects involving energy efficiency and renewable energy in developing countries.

### Why compensate?

Compensating a stand's CO<sub>2</sub> emissions gives your business notoriety and is an added value for your brand. It positions your company thanks to its commitment to society and to the fight against climate change and sets it apart from other competitors.

Our projects use methodologies approved by the United Nations Framework Convention on Climate Change, have Gold Standard or Verified Carbon Standard certificates and are verified every year by third parties.

### Publicise the pledge

Once offset has been made, **lavola** will provide two vinyls with the offset logo to display on the stand.

## Stages in the carbon strategy

**lavola** provides a complete carbon management service with four distinct stages:

..... Carbon footprint

..... Mitigation

..... Offset

..... Communication

## Benefits

NOTORIETY  
VALUE  
POSITION  
COMMITMENT  
DISTINCTION

## 1 Object

These conditions shall apply to the contracting of all goods, supplies and services duly outlined specified in the Catalogue.

## 2 Contracting regime

All of the goods and supplies listed shall be provided on a rental basis, with the exception of merchandising.
