EUROECHO 2008 Opportunities for Industries

EUROECHO is the biggest echocardiography meeting in the world gathering together healthcare professionals specialised in the application of cardiac ultrasound and other non-invasive techniques. Industry Partners will reach an international delegate audience using this unique opportunity to showcase their products and services to specialists in their respective fields. Participating companies and their products will be associated with, and contribute to, the high quality scientific and clinical content of the congress.

IMPORTANT NOTICE
The accrued points system has been slightly modified.

Spending points
The Accrued Points priority system will only apply to requests received before the official application deadline.

After the official application deadline has passed, stands and satellite timeslots will be assigned on a first come, first served basis.

How to Accrue Points
Exhibition: 1 point per 9m² stand space taken; + 5 points for participation
Satellite Symposium: 10 points
User Group Session: 5 points
Advertisement and Sponsorship: 1 point per €2,000 spent

NEW!!

Imaging campus
For the first time this year, the European Association of Echocardiography is introducing the Imaging Campus.
The Imaging Campus is located between the Registration Area and the Exhibition Hall and is dedicated exclusively to training of delegates on specific devices or techniques.
See Page 7 for more details.

(1) Advertising Rules
Advertisements may not include product name, product logo or misleading names that could be perceived as product names or registered trademarks. Only corporate names and logos will be allowed. All content and artwork must gain prior approval from the ESC.

(2) Subject to availability
NEW!! Imaging Campus

The Imaging Campus is a joint collaboration between EUROECHO and our Industry Partners to create educational and demonstrative learning opportunities. This initiative will provide supporting companies with a unique means of associating these companies and products with the educational requirements of delegates in an exclusive and intimate environment. The Campus will be located in between the Registration Area and the Exhibition.

The campus will offer delegates a unique one-on-one, hands-on learning experience with specific objectives.

The number of participants at each session is restricted to 15-20 per room and participants must register in advance. Each session will run four times per day on the same topic offering this enriching learning experience to a maximum number of delegates. The length of each session will be approximately one hour. During the sessions the attendees will have close contact with the teachers who will demonstrate the different techniques, workstations or how to approach a patient i.e. contrast echo, stress echo or 3D.

There will also be a focus on interaction with other imaging modalities like CT or MRI (including the use of MRI or CT workstations).

Industry partners are invited to support a learning session in the following manner:
- Provision & set-up of equipment for hands-on learning session
- Proposal of teachers for the session to be validated by the committee
- Four learning sessions per day at fixed time slots
- Respect of learning objectives fixed for the session

There will be no official sponsorship recognition of the supporting industry during the learning session. The workstation or equipment used in each room will be exclusively from the supporting company and, if needed, a technician from the company may be present at each session.

Companies will be acknowledged as sponsors on the EUROECHO pages of the ESC Web Site and in the Final Programme.

Educational Grant Support

Industry Partners are invited to “associate” with the Scientific Programme of EUROECHO 2008, or a specific session within it, on the following strict guidelines:

An Unrestricted Educational Grant demonstrates a company’s support and association with an aspect of the Scientific Programme. This does not offer the opportunity to influence the session planning (e.g. speaker suggestion, topic proposal or other such involvement). The support of a scientific session in the form of an Unrestricted Educational Grant implies the acceptance of the EAE to permit the company to associate in name with a session already defined as part of the EUROECHO scientific programme.

The Supporting Industry may not advertise or promote their grant association.
