PRIMARY CARE SATELLITE SYMPOSIUM

60 minutes **Primary Care Satellite Symposia** for general practitioners who are faced on a daily basis with the diverse issues surrounding cardiac care.

These sessions are organized by exhibiting companies within the Congress Centre lecture rooms ranging from 120 to 3000 seats.

Companies are invited to organise sessions on cardiovascular disease for primary care professionals. These sponsored sessions are open for company subsidiaries that will be using the mother company booth to qualify. A special provision has been made for these sessions to be held in the local language for the ESC Congress 2008, notably German to facilitate communication with this new target group. This will be a key platform to focus on the primary care audience for cardiovascular care.

9.1 Primary Care Registration

Tuesday all day & Wednesday am.

Requirements:

Proof of general practitioner profession.

Registration as part of industry group (not open to individual registration).
