We hereby order – in the name and on behalf of the above-named exhibitor – subject to the water connection and supply terms detailed on page 2:

Item no.	Quantity	Main water connection including connection of one appliance	EUR/unit
38100		Main water connection, hall area (ground level)	282.00
38101		Main water connection, upper level (two-storey stand)	328.50
38200		Main water connection, outdoor exhibition area F5 – F8	322.00

Main water connection includes: Inflow: 1/2", outflow: DN 50
Installation of piping overground from utility/supply duct (hall) or connection shaft (open-air area)
Water consumption included
Connection of one appliance, e.g. (rental) sink

Item no.	Quantity	Misc. services	EUR/unit
38050		Connection of each additional appliance e.g. dishwasher, water boiler, etc. <u>Please note:</u> Price is only valid for appliances that will be placed no further than 1 m from the main connection.	46.00
38051		Rental sink unit Sink unit with substructure, taps and fittings, 5 l electric boiler Dimensions: W/H/D = 90/80/60 cm	120.20
38090	---	Standard hourly rate	45.20
38005		To fill basin/pool – up to 3 m³	102.00
38006		To fill basin/pool – 4 m³ to 10 m³	as per costs incurred

38051 Rental sink unit
(Similar model shown)

Please note:

The use of commercial dishwashers with a rinse cycle of **two minutes or less** and the preparation or demonstration of products containing grease and/or oil requires the use of grease traps for the wastewater being discharged (see Service Form 5.8).
(see also "Water connection and supply terms" on page 2).

Contact us for an individual quote on special installations, such as those requiring larger main connection fittings.

A surcharge (item no. 38951) amounting to EUR 85.00 will be raised for any orders/plans submitted later than 2 weeks prior to start of the official set-up.

We will be erecting a raised platform at our stand:

- ☐ **Yes**, the height difference between hall floor level and platform surface will be approx. _____ cm
- ☐ **No**

Place, date
Company stamp and legally binding signature of exhibitor

It is imperative that a ground plan (form 5.2) be submitted if a main water connection is required.

Water connection and supply terms

A. Ordering main water connection

Orders and scaled ground plan diagrams for the main water connection (form 5.2) must be received by Messe München GmbH no later than six weeks prior to the official dates indicated for the stand assembly period.

Messe München GmbH cannot guarantee the timely installation of connections requested after this deadline.

A surcharge (item no. 38951) amounting to EUR 85.00 will be raised for any orders/plans submitted later than 2 weeks prior to start of the official set-up.

B. Water connection information

All water utilities are provided on a rental basis only. Installation and connection of appliances to the pipeline network is carried out exclusively by MMG contractors.

Any repair work necessary to installations, appliances or exhibits not set up by or rented from MMG will be invoiced at the standard hourly rate (see item no. 38090).

The exhibitor is obliged to turn off the entire water supply to the stand via the stopcock built into the main water connection every day after the exhibition closes.

Property damage arising from negligence will be the responsibility of the exhibitor. For safety reasons, Messe München GmbH reserves the right to turn off the entire water supply to exhibitors once the event has ended. MMG accepts no liability for damage.

- The general water pressure is 3.5 bar.
- The price paid for the main water connection also includes the cost of the water consumed.
- Waste water that is chemically contaminated or greasy may not be disposed of via the normal drainage system.

Required plan documentation

Supply and outflow lines will be installed in the exhibition halls according to dimensions submitted on the ground plan diagram (Form 5.2). The diagram must indicate the distance between the edge of your stand and the connection and the stand's relative location within the hall. **Orders not containing this information cannot be processed!**

Main water connection in the halls

If at all possible, the piping will be laid in utility ducts, but may have to run above ground if the location of the connection point ordered makes this necessary. In the case of the main water connection for a stand's upper storey, max. 3 m supply/drainage piping laid vertically is included in the connection price. Any additional, horizontally laid piping (via the hall floor and/or in the flooring between the two storeys) will be charged as per the costs incurred (man-hours, material costs, etc.)

Main water connection in the outdoor exhibition areas

For outdoor exhibition areas F5 – F8, piping for all orders will be installed overground. Due to the risk of frost, water connections are generally not available for the outdoor exhibition areas during the winter months; however, pipe heating can be installed at the exhibitor's expense upon arrangement with Messe München GmbH.

Messe München GmbH reserves the right to cut off the water supply outside the duration of the event.

Connection of appliances

Connection of one appliance (e.g. a sink unit) is included in the main water connection price. The connection of each additional appliance (installation/dismantling of portable kitchenettes, sinks, water heaters, dishwashers, coffee machines, etc. provided by the exhibitor) will be invoiced separately.

If the distance between the appliance to be connected and the main water connection exceeds 1 m, the extra expense for installing the connection of the appliance will be invoiced additionally.

The connection of a free-standing appliance (e.g. a counter) requires a separate main water connection.

For **rental sink units** (item no. 38051), delivery, maintenance and collection are included in the price. However, connection of the sink unit is not included in the rental price.

For safety reasons, dishwashers without a built-in drainage pump will not be connected to the water mains in cases where the drainage gradient is insufficiently steep.

Basinsfuls of water

In the case of orders for basinsfuls of water, the unauthorised disposal of the water concerned via the utility ducts is prohibited.

C. Grease traps

Exhibitors ordering the installation of a main water connection for their stand from MMG who also plan to prepare, process or present food items containing grease or oil are obliged to additionally order a grease trap through MMG no later than four weeks before the start of stand assembly. This also applies to exhibitors operating commercial dishwashers at their stand which finish an entire cycle in **under two minutes**.

Grease trap order forms may be obtained through the Technical Exhibition Services Division.

If, after stand assembly has begun, MMG ascertains that an exhibitor with stationary or mobile catering operations has failed to order a grease trap for a main water connection despite being obliged to do so according to these connection and supply conditions, the exhibitor hereby agrees that MMG will install the appropriate grease trap equipment at current prices valid for that event without MMG having received an order to this effect from the exhibitor.

In this case, or in the event that an order is placed less than four weeks before the start of stand assembly, MMG is entitled to invoice a late-order surcharge for the required grease trap equal to 50 percent of the price in effect at the time of the event, unless the exhibitor can prove that MMG has suffered no loss or negligible loss as a result.

If installation of a main water connection and grease trap is either not feasible, or only possible at excessively high cost, MMG may require that the exhibitor neither produce, process or demonstrate any goods containing grease or oil at their stand nor operate a commercial dishwasher that completes an entire cycle in **two minutes or less**.

D. Cancellation/complaints

Orders may be withdrawn up to 14 days before the general stand installation period begins; the exhibitor will be charged for the connections ordered in cases of cancellations submitted after this deadline.

The list of tolerances and dimensions provided to the exhibitor or ordering party should be reviewed, countersigned and returned as soon as possible.

This list will also be used subsequently for invoicing purposes.

Complaints pertaining to the scope of supply and services provided must be addressed Messe München GmbH's Main Technical Exhibition Services Division prior to stand dismantling to ensure that the complaints concerned can be investigated in a proper manner. Subsequent complaints regarding the scope of products or services will not be acknowledged.

Messe München GmbH's General Terms of Contract for Exhibition Services apply additionally.
