Halogen spot with extension arm
100 W

32822
Low-voltage spotlight for lighting rail,
50 W, adjustable

32823
Spotlight for lighting rail,
75 W, adjustable

Conditions for the connection and supply of additional electrical installations

1. Please use form 3.3 to order additional electrical installations. Orders and stand diagrams must be submitted no later than six weeks prior to the beginning of stand installation to the MMG Technical Exhibition Services Division. No guarantee can be given for the timely completion of installations applied for after this deadline. MMG reserves the right to invoice a surcharge for late orders.
2. **Electrical installations are provided on a rental basis only.** The General Terms of Contract for the Exhibitors' Service Booklet shall be considered an integral part of this contract.
3. Electrical installations within the stand and downstream of the transfer point between MMG and the exhibitor may be carried out by the exhibitor's own electricians or licensed electrical contractors.
4. **Serious violation of the regulations (including DIN VDE 0108) will result in the power supply being cut off. In such cases, no refund shall be due on the costs of installations already completed. Charges for the main connection will be invoiced in every case.**
5. All exhibition stand electrical installations will be inspected by an expert for compliance with the regulations currently effective at the trade fair grounds in Munich. Any deficiencies found are to be immediately rectified.
6. **The list of dimensions and tolerances supplied to the exhibitor or ordering party should be reviewed, countersigned and returned as soon as possible. This list will also be used subsequently for invoicing purposes. Complaints pertaining to the scope of products and services provided must be addressed to the Technical Exhibition Services Division at Messe München GmbH prior to stand dismantling in order to allow the opportunity for an appropriate assessment. Subsequent complaints regarding the scope of products or services will not be acknowledged.**
7. Repair work conducted on equipment not installed by MMG will be invoiced according to actual labour hours required.
8. Orders may be withdrawn up to 14 days before the general stand installation period begins; the exhibitor will be charged for the connections ordered in cases of cancellations submitted after this deadline.
9. The exhibitor is obliged to disconnect the power supply daily after the exhibition closes, using the master switch incorporated in the main connection. Circuits for devices needing a continuous current supply (separate outlets and circuits required) are exempt. The exhibitor shall be fully liable for the electrical installation and use thereof within the exhibitor's stand area.
10. **For safety reasons, the entire power supply to exhibitors will be switched off approximately one hour after the end of the event. After the final day, this will not apply to exhibitors whose power supply order includes the stand dismantling period.**
